SUMMARY

Final-year B. Tech CS student at SRM IST with a published IEEE paper, 9.74 CGPA, and hands-on experience in ML, NLP, and generative AI. Seeking a software engineering or AI internship to build impactful ML pipelines and AI-powered systems.

EXPERIENCE

ML Engineer Intern QuantumU.ai — Remote, California USA Apr 2026 – May 2026

(Qwen 2.5, GLM-4.5-Air, FLUX.1, CosyVoice, InstantID, FlashHead, FFmpeg, NLLB-200, MongoDB, S3, Python)

- Developed an end-to-end multilingual AI lecture platform converting educational content into lip-synced avatar videos across five languages, running all models locally on an RTX GPU.
- Trained Qwen 2.5 SLM (script gen), GLM-4.5-Air (charts/diagrams), FLUX.1 (illustrations), CosyVoice (TTS + voice cloning), InstantID (avatar synthesis), FlashHead + FFmpeg (lip-sync video via NLLB-200 translation).
- Built slide generation pipeline using python-pptx and LibreOffice CLI (PPTX to PNG); managed storage with MongoDB (persistent) and AWS S3 (temporary).

Frontend Developer Intern MARGSOFT Technologies (P) Limited — Lucknow May 2025 – Jul 2025

(Three.js, GSAP, Lenis, Blender, ScrollTrigger, JavaScript, HTML, CSS) | GitHub | GitHub2

- Designed and developed two production 3D web prototypes: Suryodaya (streetlight reporting portal with animated Tesseract model) and a Vehicle Tracking System (spotlight animations synced to scroll).
- Used Three.js (3D rendering), Blender (. glb models), GSAP + ScrollTrigger (horizontal sections, section pinning, SplitText), and Lenis (smooth scrolling).

PROJECTS

VeraHire Resume Validator *(Python, Flask, Ollama, phi3, LLaMA 3.2, MongoDB, REST APIs)* Jan 2026 – Apr 2026

- Built a full-stack resume intelligence platform with PDF ingestion, regex entity identification, Ollama-powered NER (phi3, LLaMA 3.2), and multi-source claim verification (GitHub, Stack Overflow, Credly).
- Automated Trust Report generation, live job scraping, and candidate-job matching with gap analysis.

Judicial Case Clustering & Geospatial Analytics *(Python, NLP, TF-IDF, K-Means, LDA, GMM, DBSCAN, Plotly, Dash)* Oct 2025 – Nov 2025

- Built an analytics pipeline processing 27,000+ Indian judicial documents, extracting metadata (court, state, district, IPC sections) using high-dimensional TF-IDF representations.
- Benchmarked K-Means, GMM, DBSCAN, and LDA with multi-metric evaluation (Silhouette, ARI, NMI, Label Coverage) using a seed-map based semantic labeling framework.
- Developed a Plotly + Dash geospatial dashboard to visualize litigation hotspots and crime-specific spatial trends across India.

RESEARCH PAPER

ICRCICN 2025 (IEEE) Feb 2026

- Comparative Study of Clustering Algorithms for Geospatial Legal Data Analysis built a scalable Apache Spark pipeline, benchmarked clustering algorithms, and visualized geospatial litigation hotspots. Published in IEEE Xplore.

EDUCATION

SRM Institute of Science and Technology B. Tech Computer Science and Engineering **CGPA: 9.74** | Expected Graduation: Jun 2027

SKILLS

Languages: Java, C++, JavaScript, Python | **Web:** HTML, CSS, Three.js, GSAP, ScrollTrigger, Lenis | **Infra / Tools:** S3, MongoDB, Git, SQL, REST APIs, DSA, OOP

ML / AI: Scikit-Learn, NLP, Pandas, NumPy, Matplotlib, Plotly, PyTorch, SLM Fine-tuning, Prompt Engineering, Multimodal Pipelines

ACHIEVEMENTS

Top Ranker & Scholarship Recipient: 4th rank in IT Department for three consecutive years | Rs. 72,000 performance scholarship for three consecutive years| Ranked 20th out of 5,448 students (top 0.4%) in SRM's Employability Assessment, based on SHL's cognitive/aptitude evaluation.

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02) | Amazon Web Services Apr 2026
- AWS Certified AI Practitioner (AIF-C01) | Amazon Web Services Apr 2026
- Introduction to Database System | NPTEL Jan 2025
- Supervised Machine Learning: Regression & Classification | Coursera Sep 2025
- Python for Data Science | NPTEL Jan 2025
- Networking Basics | Cisco Networking Academy Nov 2025
- Programming in Java | NPTEL Jan 2025
