Education

SRM Institute of Science and Technology **2023 – Present**
B.Tech in Computer Science and Engineering (Specialization in Computer Networking) **CGPA: 9.40**

Coursework: Computer Networks, Operating Systems, Data Structures, DBMS, Algorithms, OOP

Technical Skills

Languages: C/C++, JavaScript, TypeScript, SQL, Python **Developer Tools:** Git, GitHub
Frameworks: React, Node.js, Express, Next.js, Tailwind **Databases:** MySQL, MongoDB

Projects

Prepwise: AI Driven Mock Interview Platform | *Next.js, Vapi AI, Gemini, Firebase, React* **2025**
GitHub | Live: prepwise.sudhirsingh.dev

- Built an AI-powered mock interview platform that simulates **technical and behavioral interviews** through real-time voice conversations for realistic interview practice.
- Engineered an interview generation pipeline where Vapi collects interview context, Gemini generates role-specific questions, and Firebase stores interview sessions, transcripts, and question sets.
- Implemented transcript-based feedback generation using Gemini to deliver **personalized performance feedback**, communication analysis, and interview scoring across completed mock sessions.

DealDrip: Ecommerce Price Tracking App | *Next.js, MongoDB, Bright Data, Cheerio, Nodemailer* **2025**
GitHub | Live: dealdrip.sudhirsingh.dev

- Built a full-stack ecommerce price tracking platform that **monitors Amazon product listings** and **notifies users of price drops and stock availability changes**.
- Engineered an automated scraping pipeline using Bright Data and Cheerio with **scheduled cron jobs** to extract pricing signals, product metadata, and inventory status.
- Implemented persistent product tracking with MongoDB and Nodemailer to deliver **real-time price alerts** and automated restock notifications.

HirePrep: AI Powered Interview Prep Platform | *Next.js, Neon PostgreSQL, Clerk, Gemini AI* **2026**
GitHub | Live: hireprep.sudhirsingh.dev

- Built a full-stack AI interview preparation platform that simulates **technical interviews**, **coding assessments**, and **resume parsing** for software engineering candidates.
- Engineered a scalable serverless architecture using Next.js, Neon PostgreSQL, and Drizzle ORM to **manage job profiles, interview state, and structured assessment workflows**.
- Integrated Clerk authentication and Google Gemini to deliver **resume-to-JD feedback**, adaptive interview guidance, and job-specific technical question generation.

Achievements

1st Place: AI Project Expo 2025 | *SRM School of Computing* **2025**

- Secured **1st place** among 30 shortlisted teams in a college-wide AI innovation competition, awarded **INR 3000 cash prize** for **Prepwise**, built with **Google Gemini API** and **Vapi AI**.

Extracurricular

- Solved **300+ algorithmic problems** on LeetCode and HackerRank, strengthening problem-solving and data structures proficiency.
- Achieved **Legend Tier** in **Google Cloud Arcade Facilitator Program** through hands-on cloud labs and challenges – Google Skills.
- Ranked **Top 10 out of 100+ teams** at **SRM Hackathon 9.0**; built ResumeIQ, an AI-powered resume analysis platform.
- Served as **Technical Member** of **Newton School Coding Club, SRM IST** during 2024–2025, contributing to technical initiatives and club activities – Certificate.
