Summary

Final-year B.Tech CSE student (CGPA 9.40) who builds and deploys **AI-integrated, full-stack applications** using LLM APIs, prompt design, and cloud services. **AWS Certified Machine Learning Engineer – Associate.** 300+ DSA problems solved. Applying for the Software Engineering Associate role, Technology Development Program 2027.

Education

SRM Institute of Science and Technology **2023 – 2027**
B.Tech in Computer Science and Engineering (Specialization in Computer Networking) **CGPA: 9.40**

Technical Skills

Languages: Python, C/C++, SQL, JavaScript, TypeScript

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Computer Networks, DBMS, Debugging

AI / ML & Cloud: AWS (ML Engineer Associate, AI Practitioner, Cloud Practitioner), LLM APIs (Google Gemini), prompt engineering, Oracle AI Vector Search, Vapi AI

Web & Data: React, Next.js, Node.js, Express, REST APIs, MongoDB, PostgreSQL, MySQL, Firebase, Drizzle ORM

Engineering Tools: Git, GitHub, serverless architecture, cron-based automation, project documentation

Projects

Prepwise: AI Driven Mock Interview Platform | *Next.js, Vapi AI, Gemini, Firebase, React* **2025**
GitHub | **Live: prepwise.sudhirsingh.dev**

- Built an AI-powered mock interview platform **for developers** that simulates **technical and behavioral interviews** through real-time voice conversations for realistic interview practice.
- Engineered an AI workflow where Vapi collects interview context, **prompts** to the Gemini LLM API generate role-specific questions, and Firebase stores interview sessions, transcripts, and question sets.
- Implemented transcript-based feedback generation using Gemini to deliver **personalized performance feedback**, communication analysis, and interview scoring across completed mock sessions.

DealDrip: Ecommerce Price Tracking App | *Next.js, MongoDB, Bright Data, Cheerio, Nodemailer* **2025**
GitHub | **Live: dealdrip.sudhirsingh.dev**

- Built and deployed a full-stack ecommerce price tracking **automation tool** that **monitors Amazon product listings** and **notifies users of price drops and stock availability changes**.
- Engineered an automated scraping pipeline (Bright Data, Cheerio) with **scheduled cron jobs** to extract pricing, metadata, and inventory status; MongoDB and Nodemailer deliver **real-time price alerts** and restock notifications.

HirePrep: AI Powered Interview Prep Platform | *Next.js, Neon PostgreSQL, Clerk, Gemini AI* **2026**
GitHub | **Live: hireprep.sudhirsingh.dev**

- Built and deployed a full-stack AI interview preparation platform for developers that simulates **technical interviews**, **coding assessments**, and **resume parsing** for software engineering candidates.
- Engineered a scalable serverless architecture using Next.js, Neon PostgreSQL, and Drizzle ORM to **manage job profiles, interview state, and structured assessment workflows**.
- Integrated Clerk **secure authentication** and the Google Gemini API to deliver **resume-to-JD feedback**, adaptive interview guidance, and job-specific technical question generation.

Certifications

- **AWS Certified Machine Learning Engineer – Associate**, AWS Certified AI Practitioner, AWS Certified Cloud Practitioner (Mar 2026)
- **Oracle AI Vector Search Certified Professional** (Apr 2025)

Achievements & Extracurricular

- **1st Place**, AI Project Expo 2025 (30 shortlisted teams), SRM School of Computing – **INR 3000** prize for **Prepwise**, built with **Google Gemini API** and **Vapi AI**.
- Solved **300+ algorithmic problems** on **LeetCode** and **HackerRank**, strengthening problem-solving, data structures, and algorithms proficiency.
- Achieved **Legend Tier** in **Google Cloud Arcade Facilitator Program** – **Google Skills**.
- Ranked **Top 10 out of 100+ teams** at **SRM Hackathon 9.0**; built **ResumeIQ**, an AI-powered resume analysis platform.
- **Technical Member**, Newton School Coding Club, SRM IST (2024–2025) – **Certificate**.
